

**Rosemarie Murphy**  
MSN, PMHNP-BC

## About Rosemarie Murphy.

Rosemarie Murphy, MSN, PMHNP-BC, obtained her Bachelor of Science in Nursing from the University of North Carolina Wilmington before earning her Master of Science in Nursing with a specialty in Psychiatry and Mental Health from Walden University. With 33 years of experience as a Psychiatric Registered Nurse, she brings extensive expertise in inpatient crisis stabilization, psychotropic medications and their side effects, chemical dependency, and medication-assisted treatment (MAT).

Rosemarie's practice style is patient-centered and goal-oriented, emphasizing thorough assessments and collaborative treatment planning. She strongly advocates for teamwork among therapists, primary care providers, and, when permitted, family members to ensure holistic and effective care. Currently practicing in an outpatient behavioral health clinic with handicap access, she provides a compassionate, nonjudgmental environment that treats every patient with dignity and respect. Her clinical interests are diverse, encompassing depression, psychotic disorders, anxiety disorders, and PTSD—a particular focus developed from years of working with Marines returning from deployment.

Additionally, she has extensive experience in managing chemical dependency and Suboxone maintenance. Looking ahead, she hopes to expand her work with children experiencing trauma and ADHD. Rosemarie's approach spans the entire lifespan, offering care to patients ranging from children to the elderly.
